

## Bias in Observation

1. You are not naturally inclined to pay attention to the details of your surroundings
2. You are inclined to filter out information.
3. You are inclined to interpret what we see, look for patterns, & make connections.
4. Your memory is faulty.

## What Influences Your Observations?

- your emotional state
- are you alone or w/ people?
- # people/animals in the area
- type of activity going on around you
- how much activity is going on around you
