

# The Moon

## Basic Information

named after: \_\_\_\_\_

orbital period: \_\_\_\_\_

length of day: \_\_\_\_\_

distance from Earth (km): \_\_\_\_\_

Visibility

Can see from Earth:    Yes        No

Brightness: \_\_\_\_\_

When/where visible: \_\_\_\_\_

## Stats

size in relation to Earth: \_\_\_\_\_

mass (kg): \_\_\_\_\_

radius (km): \_\_\_\_\_

gravity: \_\_\_\_\_

average temperature on surface (°C): \_\_\_\_\_

Interior: \_\_\_\_\_

## Orbital Peculiarities:

Volcanoes                    Yes        No

                                  Active:    Yes        No

                                  Type: \_\_\_\_\_

Impact Craters:            Yes        No

Erosion:                     Yes        No

Liquid Present:            Yes        No        In the Past

                                  Type: \_\_\_\_\_

## Origin and History

## Interesting Facts/Peculiarities
